

# We're Proud of You, Be Proud of You!

We are doing everything we can to keep patients and teammates safe during the spread of COVID-19. We know you are on the frontlines of health care, putting aside your own fears and concerns and leading the charge to give life to our vulnerable community.

## Helpful Reminders:

- **We can't do what we do without you.** Putting our patients first and providing life-sustaining dialysis care is in your hands. While you're facing challenges, remember One for All! All for One!
- **This is what you know. Be proud!** Through all your trainings and preparations as frontline heroes in health care, you are the expert—you understand infections and diseases and know how to deliver high-quality care.
- **We're here for you.** We care for our teammates with the same intensity in which we care for our patients. If you need anything, or think we should be doing something better, please remember DaVita's leaders have an open door. [To share ideas --> click here.](#)

## Why are you proud to serve your patients at a time like this?
